## Employment

### **Aug. 1999 – Oct. 2008      CSI Millwork      Kerrville, TX**

Sr. Project Manager – Commercial Division

- Accountable for full processing of woodwork for commercial construction projects. Secures and estimates project. Reviews, negotiates and executes contract terms. Sets up initial mobilization of awarded projects. Lines out directives for buyouts and/or in-house manufacturing. Oversees team that manages onsite personnel and resources. Prepares change orders, billings, and closeout documents.

### **April 1996 – August 1999      Arrowwood Cabinetry      San Antonio, TX**

Manufacturing Manager

- Oversaw daily activities of manufacturing plant. Set up production goals and quotas to maintain desired profit margins. Assisted in developing database to provide schedule of future and in progress work as well and report to accounting the daily tracking of work in process. Filled the role of purchasing agent, implementing just-in-time ordering and delivery of materials. Continued with the overseeing of the drafting department.

Manufacturing Engineer

- Responsible for the activities of the drafting department. Radically changed the methods of producing drawings for customer review and for manufacturing efficiencies. Maintained software package ensuring accurate materials bills for plant. Reviewed and implemented new software packages as needed.

### **June 1982 – April 1996      Handcraft Cabinets      Boerne, TX**

Draftsman/Designer

- Review blueprints, specifications, and notes to produce workable designs needed for cost effective manufacturing. Drafts completed with bill of materials and part call sheets needed by plant. Assisted in developing a timely delivery schedule, coordinating the needs of the construction project with the abilities of the company.

Service Representative

- Worked closely with customers to evaluate concerns and discuss methods of product improvement. Performed on-site inspections to identify problems and provide response to manufacturing. Developed and correlated solutions for any recurring design complication.

Shop Foreman

- Directed the activities of personnel on the production line. Established production quotas, quality goals, and maintenance schedules. Supervised the construction of four building expansions. Coordinated purchasing for, and control of, all trades to ensure compliance with established codes. Established cost-effective inventory levels for consumable materials. Designed and crafted specialty cabinets and related millwork.

Education      **May 1982 – December 1995      San Antonio College      San Antonio, TX**
